Plant Science, 78 (1991) 269—271
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 78 (1991)

Abiotic elicitation, *Arachis hypogaea*, groundnut, phytoalexins, 157
Abiotic inducers, sugars, hormones, laminarinase, plant cells, 27
Abscisic acid, hormone biosynthesis, tetcyclacis, osmotic effects, seed parts, *Zea mays*, 19
S-Adenosyl-L-methionine decarboxylase, arginine decarboxylase, ethylene, leaf senescence, ornithine decarboxylase, *Oryza sativa*, putrescine, 193
Agrobacterium rhizogenes, *Agrobacterium tumefaciens*, *Pisum sativum* L., root tissue, protoplasts, transformation, 247
Agrobacterium rhizogenes, hairy roots, *Hyoscyamus muticus*, organogenesis, plant regeneration, 129
Agrobacterium tumefaciens, *Agrobacterium rhizogenes*, *Pisum sativum* L., root tissue, protoplasts, transformation, 247
Amphiphiles, calcium, protein kinase, 165
α-Amylase, β-amylase, pullulanase, maize, endosperm, starch hydrolysis, 143
β-Amylase, α-amylase, pullulanase, maize, endosperm, starch hydrolysis, 143
α-Putrescine, *S*-adenosyl-L-methionine decarboxylase, arginine decarboxylase, ethylene, leaf senescence, ornithine decarboxylase, *Oryza sativa*, spermidine, spermine, 193
α-Amylase, *Cicer arietinum* L. cv 'Castellana', embryonic axis, phytochrome, cotyledons, 207
Amyloplast DNA, chloroplast DNA, DNA methylation, 5-methylcytosine, *Pisum sativum*, 33
Anthocyanin, natural colors, plant cell culture, secondary metabolite production, tonoplast ATPase, *Vitis* hybrid, 107
Arachis hypogaea, groundnut, phytoalexins, abiotic elicitation, 157
Arginine decarboxylase, *S*-adenosyl-L-methionine decarboxylase, ethylene, leaf senescence, ornithine decarboxylase, *Oryza sativa*, putrescine, putrescine, spermidine, spermine, 193
Aseptic plants, potato, leaves, *Phytophthora infestans*, superoxide, plant resistance, 151
ATP synthase inhibitors, selectable mutations, 53

Barley endosperm, gene expression, protoplasts, particle bombardment, 237
Brassica, somatic hybridization, proplastids and chloroplasts, cell cycle asynchrony, differentiation, mesophyll and hypocotyl protoplasts, 89 Calcium, plant mitochondria, submitochondrial particles, polarity, glycoprotein, NAD(P)H oxidation, 177

Calcium, protein kinase, amphiphiles, 165
Cell culture contamination, microorganism, 231
Cell cycle asynchrony, *Brassica*, somatic hybridization, proplastids and chloroplasts, differentiation, mesophyll and hypocotyl protoplasts, 89
Chloroplast DNA, amyloplast DNA, DNA methylation, 5-methylcytosine, *Pisum sativum*, 33
Chromatin, histone acetylation, histone deacetylases, histone acetyltransferases, nucleosomes, *Pisum sativum*, 43
Chromatin, HRGP, maize, nuclease, S1-nuclease, 225
Cicer arietinum L. cv 'Castellana', embryonic axis, phytochrome, α-amylase, cotyledons, 207
Cotyledons, *Cicer arietinum* L. cv 'Castellana', embryonic axis, phytochrome, α-amylase, 207
Cryopreservation, shoot meristems, *Trifolium repens* L., vitrification, white clover, 81
Crystalloids, embryogenesis, *Picea glauca*, SDS-PAGE, western blot analysis, matrix proteins, 61
Cyanobacteria, homologous recombination, *psb*A, 217
Daucus carota, embryo, lipid body, somatic, ultrastructure, zygotic, 259

Differentiation, *Brassica*, somatic hybridization, proplastids and chloroplasts, cell cycle asynchrony, mesophyll and hypocotyl protoplasts, 89
DNA methylation, amyloplast DNA, chloroplast DNA, 5-methylcytosine, *Pisum sativum*, 33

Electrophoresis, *Pharbitis nil*, flowering, short day and night breaks, 11
Embryo, *Daucus carota*, lipid body, somatic, ultrastructure, zygotic, 259 Embryogenesis, *Picea glauca*, SDS-PAGE, western blot analysis, crystalloids, matrix proteins, 61
Embryonic axis, *Cicer arietinum* L. cv 'Castellana', phytochrome, α-amylase, cotyledons, 207
Endosperm, α-amylase, β-amylase, pullulanase, maize, starch hydrolysis, 143
Ethylene, *S*-adenosyl-L-methionine decarboxylase, arginine decarboxylase, leaf senescence, ornithine decarboxylase, *Oryza sativa*, putrescine, spermidine, spermine, 193

Flowering, *Pharbitis nil*, electrophoresis, short day and night breaks, 11
Foliar senescence, *Hordeum vulgare*, radiolabelling, galactolipids, phosphatidylcholine, respiration, 199

Galactolipids, *Hordeum vulgare*, foliar senescence, radiolabelling, phosphatidylcholine, respiration, 199
Gene expression, barley endosperm, protoplasts, particle bombardment, 237

β-Glucuronidase, microanalysis, microinjection, *Nicotiana*, stable transformation, transient expression, 73
Glycoprotein, plant mitochondria, submitochondrial particles, polarity, NAD(P)H oxidation, calcium, 177
Graminales, storage proteins, legumin, monocotyledons, Poaceae, 185
Groundnut, *Arachis hypogaea*, phytoalexins, abiotic elicitation, 157

Hairy roots, *Agrobacterium rhizogenes*, *Hyoscyamus muticus*, organogenesis, plant regeneration, 129
Histone acetylation, histone deacetylases, histone acetyltransferases, chromatin, nucleosomes, *Pisum sativum*, 43
Histone acetyltransferases, histone acetylation, histone deacetylases, chromatin, nucleosomes, *Pisum sativum*, 43
Histone deacetylases, histone acetylation, histone acetyltransferases, chromatin, nucleosomes, *Pisum sativum*, 43
Homologous recombination, cyanobacteria, *psb*A, 217
Hordeum vulgare, foliar senescence, radiolabelling, galactolipids, phosphatidylcholine, respiration, 199
Hormones, sugars, abiotic inducers, laminarinase, plant cells, 27
Hormone biosynthesis, abscisic acid, tetcyclacis, osmotic effects, seed parts, *Zea mays*, 19
HRGP, chromatin, maize, nuclease, S1-nuclease, 225
Hyoscyamus muticus, *Agrobacterium rhizogenes*, hairy roots, organogenesis, plant regeneration, 129

Imbibitional damage, pollen, infrared, membrane transition, 1
Infrared, pollen, imbibitional damage, membrane transition, 1
Internodes, *Populus* × *euramericiana*, nodes, in vitro plantlets, 99
In vitro plantlets, *Populus* × *euramericiana*, internodes, nodes, 99
In vitro rooting, *Spinacia oleracea* L., micropropagation, plant tissue culture, 121

Laminarinase, sugars, hormones, abiotic inducers, plant cells, 27
Leaf senescence, *S*-adenosyl-L-methionine decarboxylase, arginine decarboxylase, ethylene, ornithine decarboxylase, *Oryza sativa*, putrescine, spermidine, spermine, 193
Leaves, potato, aseptic plants, *Phytophthora infestans*, superoxide, plant resistance, 151
Legumin, storage proteins, monocotyledons, Graminales, Poaceae, 185
Lipid body, *Daucus carota*, embryo, somatic, ultrastructure, zygotic, 259

Maize, α-amylase, β-amylase, pullulanase, endosperm, starch hydrolysis, 143
Maize, chromatin, HRGP, nuclease, S1-nuclease, 225
Matrix proteins, embryogenesis, *Picea glauca*, SDS-PAGE, western blot analysis, crystalloids, 61
Membrane transition, pollen, infrared, imbibitional damage, 1
Mesophyll and hypocotyl protoplasts, *Brassica*, somatic hybridization, proplastids and chloroplasts, cell cycle asynchrony, differentiation, 89
5-Methylcytosine, amyloplast DNA, chloroplast DNA, DNA methylation, *Pisum sativum*, 33
Microanalysis, β-glucuronidase, microinjection, *Nicotiana*, stable transformation, transient expression, 73
Microinjection, β-glucuronidase, microanalysis, *Nicotiana*, stable transformation, transient expression, 73
Microorganism, cell culture contamination, 231
Micropropagation, *Spinacia oleracea* L., plant tissue culture, in vitro rooting, 121
Monocotyledons, storage proteins, legumin, Graminales, Poaceae, 185

NAD(P)H oxidation, plant mitochondria, submitochondrial particles, polarity, glycoprotein, calcium, 177
Natural colors, anthocyanin, plant cell culture, secondary metabolite production, tonoplast ATPase, *Vitis* hybrid, 107
Nicotiana, β-glucuronidase, microanalysis, microinjection, stable transformation, transient expression, 73
Nodes, *Populus* × *euramericiana*, internodes, in vitro plantlets, 99 Nuclease, chromatin, HRGP, maize, S1-nuclease, 225
Nucleosomes, histone acetylation, histone deacetylases, histone acetyltransferases, chromatin, *Pisum sativum*, 43

Organogenesis, *Agrobacterium rhizogenes*, hairy roots, *Hyoscyamus muticus*, plant regeneration, 129
Ornithine decarboxylase, *S*-adenosyl-L-methionine decarboxylase, arginine decarboxylase, ethylene, leaf senescence, *Oryza sativa*, putrescine, spermidine, spermine, 193
Oryza sativa, *S*-adenosyl-L-methionine decarboxylase, arginine decarboxylase, ethylene, leaf senescence, ornithine decarboxylase, putrescine, spermidine,. spermine, 193
Osmotic effects, abscisic acid, hormone biosynthesis, tetcyclacis, seed parts, *Zea mays*, 19

Particle bombardment, barley endosperm, gene expression, protoplasts, 237
Pharbitis nil, flowering, electrophoresis, short day and night breaks, 11
Phosphatidylcholine, *Hordeum vulgare*, foliar senescence, radiolabelling, galactolipids, respiration, 199
Phytoalexins, *Arachis hypogaea*, groundnut, abiotic elicitation, 157
Phytochrome, *Cicer arietinum* L. cv 'Castellana', embryonic axis, α-amylase, cotyledons, 207
Phytophthora infestans, potato, leaves, aseptic plants, superoxide, plant resistance, 151
Picea glauca, embryogenesis, SDS-PAGE, western blot analysis, crystalloids, matrix proteins, 61
Pisum sativum L., *Agrobacterium tumefaciens*, *Agrobacterium rhizogenes*, root tissue, protoplasts, transformation, 247
Pisum sativum, amyloplast DNA, chloroplast DNA, DNA methylation, 5-methylcytosine, 33
Pisum sativum, histone acetylation, histone deacetylases, histone acetyltransferases, chromatin, nucleosomes, 43
Plant cells, sugars, hormones, abiotic inducers, laminarinase, 27
Plant cell culture, anthocyanin, natural colors, secondary metabolite production, tonoplast ATPase, *Vitis* hybrid, 107

Plant mitochondria, submitochondrial particles, polarity, glycoprotein, NAD(P)H oxidation, calcium, 177
Plant regeneration, *Agrobacterium rhizogenes*, hairy roots, *Hyoscyamus muticus*, organogenesis, 129
Plant resistance, potato, leaves, aseptic plants, *Phytophthora infestans*, superoxide, 151
Plant tissue culture, *Spinacia oleracea* L., micropropagation, in vitro rooting, 121
Poaceae, storage proteins, legumin, monocotyledons, Graminales, 185
Polarity, plant mitochondria, submitochondrial particles, glycoprotein, NAD(P)H oxidation, calcium, 177
Pollen, infrared, imbibitional damage, membrane transition, 1
Populus × *euramericiana*, internodes, nodes, in vitro plantlets, 99
Potato, leaves, aseptic plants, *Phytophthora infestans*, superoxide, plant resistance, 151
Proplastids and chloroplasts, *Brassica*, somatic hybridization, cell cycle asynchrony, differentiation, mesophyll and hypocotyl protoplasts, 89
Protein kinase, calcium, amphiphiles, 165
Protoplasts, *Agrobacterium tumefaciens*, *Agrobacterium rhizogenes*, *Pisum sativum* L., root tissue, transformation, 247
Protoplasts, barley endosperm, gene expression, particle bombardment, 237
*psb*A, cyanobacteria, homologous recombination, 217
Pullulanase, α-amylase, β-amylase, maize, endosperm, starch hydrolysis, 143
Putrescine, *S*-adenosyl-L-methionine decarboxylase, arginine decarboxylase, ethylene, leaf senescence, ornithine decarboxylase, *Oryza sativa*, spermidine, spermine, 193

Radiolabelling, *Hordeum vulgare*, foliar senescence, galactolipids, phosphatidylcholine, respiration, 199
Respiration, *Hordeum vulgare*, foliar senescence, radiolabelling, galactolipids, phosphatidylcholine, 199
Root tissue, *Agrobacterium tumefaciens*, *Agrobacterium rhizogenes*, *Pisum sativum* L., protoplasts, transformation, 247

S1-nuclease, chromatin, HRGP, maize, nuclease, 225
SDS-PAGE, embryogenesis, *Picea glauca*, western blot analysis, crystalloids, matrix proteins, 61
Secondary metabolite production, anthocyanin, natural colors, plant cell culture, tonoplast ATPase, *Vitis* hybrid, 107
Seed parts, abscisic acid, hormone biosynthesis, tetcyclacis, osmotic effects, *Zea mays*, 19
Selectable mutations, ATP synthase inhibitors, 53
Shoot meristems, cryopreservation, *Trifolium repens* L., vitrification, white clover, 81
Short day and night breaks, *Pharbitis nil*, flowering, electrophoresis, 11
Somatic, *Daucus carota*, embryo, lipid body, ultrastructure, zygotic, 259
Somatic hybridization, *Brassica*, proplastids and chloroplasts, cell cycle asynchrony, differentiation, mesophyll and hypocotyl protoplasts, 89
Spermidine, *S*-adenosyl-L-methionine decarboxylase, arginine decarboxylase, ethylene, leaf senescence, ornithine decarboxylase, *Oryza sativa*, putrescine, spermine, 193
Spermine, *S*-adenosyl-L-methionine decarboxylase, arginine decarboxylase, ethylene, leaf senescence, ornithine decarboxylase, *Oryza sativa*, putrescine, spermidine, 193
Spinacia oleracea L., micropropagation, plant tissue culture, in vitro rooting, 121
Stable transformation, β-glucuronidase, microanalysis, microinjection, *Nicotiana*, transient expression, 73
Starch hydrolysis, α-amylase, β-amylase, pullulanase, maize, endosperm, 143
Storage proteins, legumin, monocotyledons, Graminales, Poaceae, 185
Submitochondrial particles, plant mitochondria, polarity, glycoprotein, NAD(P)H oxidation, calcium, 177
Sugars, hormones, abiotic inducers, laminarinase, plant cells, 27
Superoxide, potato, leaves, aseptic plants, *Phytophthora infestans*, plant resistance, 151

Tetcyclacis, abscisic acid, hormone biosynthesis, osmotic effects, seed parts, *Zea mays*, 19
Tonoplast ATPase, anthocyanin, natural colors, plant cell culture, secondary metabolite production, *Vitis* hybrid, 107
Transformation, *Agrobacterium tumefaciens*, *Agrobacterium rhizogenes*, *Pisum sativum* L., root tissue, protoplasts, 247
Transient expression, β-glucuronidase, microanalysis, microinjection, *Nicotiana*, stable transformation, 73
Trifolium repens L., cryopreservation, shoot meristems, vitrification, white clover, 81

Ultrastructure, *Daucus carota*, embryo, lipid body, somatic, zygotic, 259

Vitis hybrid, anthocyanin, natural colors, plant cell culture, secondary metabolite production, tonoplast ATPase, 107
Vitrification, cryopreservation, shoot meristems, *Trifolium repens* L., white clover, 81

Western blot analysis, embryogenesis, *Picea glauca*, SDS-PAGE, crystalloids, matrix proteins, 61
White clover, cryopreservation, shoot meristems, *Trifolium repens* L., vitrification, 81

Zea mays, abscisic acid, hormone biosynthesis, tetcyclacis, osmotic effects, seed parts, 19
Zygotic, *Daucus carota*, embryo, lipid body, somatic, ultrastructure, 259
